COMPETITION SWIMWEAR

Fast, fluid, sleek and streamlined. Nike competitive swimwear is designed to help reduce drag so you can slice through the water and shave time off your race.

THE SCIENCE OF SPEED

Nobody understands human-powered speed better than Nike. It's the very foundation of what we stand for: improving performance for all athletes, no matter what their sport. For Nike Swim, we apply our knowledge of swim athletes' range of motion and fluid dynamics to every suit we make, giving swimmers every possible advantage in the race against time.

The goal of our suits is to create a flow of water over the athlete that's as clean as possible. Seams are either eliminated or aligned with the flow to create a smooth transition from skin to suit. The result is a suit with zero distractions that allows the athlete to focus on his or her stroke.

Exciting bursts of color have been infused into clean and sleek silhouettes that have been designed to perform at the highest level of competition.

Nike Swim offers several NFHS, NCAA & FINA approved, elite-level suits designed for swimmers requiring for the ultimate competitive edge. Each suit features a "FINA Approved" heat transfer logo authenticating its compliance.

1 SLEEK DESIGN

Visually uncomplicated to allow the maximum focus on the swimmer's performance.

2 NIKE NO SEW

Leg openings use a bonded elastic fabric that lies smoothly against the skin to minimize drag and maximize comfort.

3 SEAM ALIGNMENTS

Wherever possible, seams are aligned with the fluid flow to minimize drag.

4 HIGH NECK

The high placement of the neckline on women's styles helps to eliminate water entry which can create drag.

FAST FABRICS

Fabrics scored high marks when evaluated against the following criteria:

- _ drag reduction
- _ water repellency
- _ stretch recovery
- _ compression
- _ strength and durability

NIKE HYDRA HD3

ULTIMATE EFFICIENCY

Nike Hydra HD3 takes the proven silhouettes from the original Nike Hydra and re-aligns the torso seams to further reduce drag, increase durability and help the athlete move with ultimate efficiency.

NIKE FITS

MODERN FAST BACK TANK

A new, sleek fashion-inspired back gives a modern update to our popular Fast Back Tank. Contrast straps and an inset of printed fabric offer interesting detail and provide extra coverage, support and comfort as you cut through the water.

p. 6, 8

CONVERTIBLE HALTER 2PC

Customize the straps to suit your swim or beat unwanted tan lines with the new Convertible Halter 2pc. Its versatile straps can be worn criss-crossed, over the shoulder or tied behind the neck. This exciting new top is paired with our Retro Brief that sits low and narrow on the hip and with an interior drawstring provides ultimate adjustability.

p. 13

CUT-OUT TANK

Created using feedback from female elite-level swimmers, this flattering tank is all about form and function. Feminine details include a lower neckline, open back, and thin straps.

p. 6, 12, 13, 14

CLASSIC LINGERIE TANK

A long-lasting, sleek-fitting suit available in both polyester and nylon. High-performance design combines great fit, functionality, comfort and support.

p. 8, 12, 14

LINGERIE TANK

This feminine-yet-functional suit offers a streamlined fit for reduced drag and more efficient performance in the water. Criss-cross lingerie straps provide enhanced range of motion and chafe-free comfort.

p. 10

SPIDER BACK TANK

This bold silhouette offers the same body of our Cut-out Tank but with a daring new look. The thin, criss-cross straps create an exciting, feminine statement while maintaining a sleek fit and high performance.

p. 8, 13, 14, 15

HIGH NECK TANK

This competitive tank combines great coverage, superior fit, and outstanding comfort. A back zipper allows for easy on-and-offs, while mesh insets prevent water from getting trapped inside. Durable polyester fabric won't break down in harsh chlorinated water for a suit that lasts season after season.

SPORT TOP 2PC

There's a reason this is one of our most popular suits: the ultra-versatile design can do double duty in the pool or on the beach. Front-lined bra top has V-shaped lingerie straps for enhanced mobility; hipster bottom features adjustable drawstring waist. Also available in X-Back.

p. 10

FAST BACK TANK

Designed to help you train fast by reducing drag, providing maximum support and offering complete ease of motion. The high neckline minimizes water intake at the front of the suit. Available in nylon and polyester.

p. 10, 13

POWER BACK TANK

This sleek tank cuts down on abrasion caused by repeated swimming movements, known as suit rubs. The smooth fit and minimal seam construction provides freedom of motion for all four strokes.

p. 9, 11
